NE075AC48ATEZ Infinity Rectifier

Feature and Advantages

- Compact – 1RU form factor provides high power density 34 Watts/Cubic inch.
- Efficient – Peak efficiency of 95.6% occurs at 50% load matching sweet spots with customer use patterns.
- Flexibly provides 75 Amps of 48 Volt power from both conventional and sustainable sources of energy.
- Starts and runs at any AC voltage from 95 to 305 Vac.
- Operates over a broad temperature range (–40°C through +75°C).
- Fail safe performance – hot insertion capabilities allow for rectifier replacement without system shutdown; soft start and inrush current protection prevent nuisance tripping of upstream breakers.
- Extended service life – parallel operation with automatic load sharing ensures that units are not unduly stressed.

Technical Specification

Uncompromised Advanced Technology to Simplify Your Network

OmniOn Energy's NE075AC48ATEZ Infinity Single-phase Rectifier is designed to efficiently transform energy from any AC source into the 48 Volt DC power needed for Central Office, MTSO and wireless cellular sites. This means that one single rectifier can be used globally to meet all your 48V powering needs.

Efficiency is market leading for diode protected, true hot pluggable, 48 Volt rectifiers. The NE075AC48ATEZ offers a powerful combination of efficiency, network simplicity and reliability.

A True System Solution

Infinity Rectifiers are part of the proven Infinity Power System platform particularly designed to meet the unique needs of the ever-changing network landscape.

- Monitoring / control – the built in microprocessor controls and monitors all critical rectifier functions and communicates with the system controller using the built in Galaxy Protocol serial interface.
- Dual Voltage Compatible - unique connector pin designation allows the 48 Volt rectifiers to be used in a "Universal" power shelf, alongside DC-DC converters supporting loads at 24 Volts dc.
- Plug and Play – installation of the rectifier in a shelf connected to a compatible system controller initializes all set up parameters automatically. No adjustments are needed.
- Proportional Load Share – when paired with a NE050, both rectifiers share equal amount of load in relation to each unit's capacity.
- Meets most 3 phase needs. Works with 208V 3 Phase in a phase to phase configuration. Works from 480V 3 Phase in a line to neutral configuration.
