

DATASHEET

NE075DC05A 48 V_{DC} to 5 V_{DC} Converter

Ordering Code: 150041591

Solar Applications

The NE075DC05 48 to 5V converter compliments our ECO Priority rectifiers for use in off grid solar applications where the served equipment may be a collection of equipment, some of which requires 48 Volts DC and some of which requires 5 Volts DC.

Features and Advantages

- Compact - 1RU form factor provides high power density.
- Efficient - Peak efficiency of 94 % occurs at less than 50% load matching sweet spots with customer use patterns.
- Flexibly provides 75 Amps of 5 Volt power from any 48 Volt DC source.
- Starts and runs at any DC voltage from 40 to 60 V_{DC}.
- Operates over a broad temperature range (-40°C through +75°C).
- Fail safe performance – hot insertion capabilities allow for converter replacement without system shutdown; inrush current protection prevents nuisance tripping of upstream breakers; coordinated start up assures that even large loads start.
- Extended service life – parallel operation with automatic load sharing ensures that units are not unduly stressed.

A True System Solution

NE075DC05 converters and ECO Priority Rectifiers are part of the proven Infinity Power System specifically designed for wireless sites.

- Monitoring / control – the built in microprocessor controls and monitors all critical converter functions and communicates with the system controller using the built in Galaxy Protocol serial interface.
- Dual Voltage Compatible - unique connector pin designation allows the 48 to 5 Volt converter to be used in a “Universal” power shelf, alongside ECO Rectifiers supporting loads and batteries at 48 Volts DC.
- Plug and Play – installation of the converter in a shelf connected to a compatible system controller initializes all set up parameters automatically. No adjustments are needed.

OmniOn Energy’s NE075DC05 48 V_{DC} to 5 V_{DC} Converter is designed to efficiently transform energy from a 48 Volt DC source into the 5 Volt DC power needed for existing wireless base station equipment. This means that new 48 V DC power and batteries supporting modern 48V LTE deployments can also support legacy systems – without having to add an additional battery string.

Available in 1U shelves for mounting in 19 and 23 inch rack rails, the NE075DC05 can be used to make 5 Volts DC from any 48 Volt DC source.

Or if the existing battery system is supported by an Infinity M plant, 48 to 5 V converters can be added with no need for additional shelf hardware.

The NE075DC05 offers a powerful combination of efficiency, network simplicity and reliability for customers who have 48 Volts DC and need 5 Volts DC.

Technical Specifications

Electrical Specifications

Input Voltage & Output Power					
Parameter	Symbol	Min	Typ	Max	Unit
Operating Voltage	V_{IN}	40		60	V_{DC}
Absolute Limits (shut down < 18V, no damage over range)		0		60	V_{DC}
Minimum Turn on Voltage	V_{IN}	40			V_{DC}
Nominal DC input current @ 54.5V			42		A
Max DC input current @ 40V in and 75 amps output	I_{IN}		60		A
Inrush Current @ 60V input	I_{IN}		<65		A
Holdover,	>1 milliseconds, with Output droop from 27.25V to 23 V				

OUTPUT					
Parameter	Symbol	Min	Typ	Max	Unit
Output Voltage Setpoint	V_{OUT}		5.25		V_{DC}
Output Voltage Range	V_{OUT}	4.5		5.25	V_{DC}
Output Current	I_{OUT}		75		A
Voltage Regulation	V_{OUT}		± 0.5		% w/ controller
Current Limit Setpoint (Full load)		30		100	%
Power Limit	W		395		Watts
Monotonic Start-up (Compare to overshoot)			<1.5		%
Ripple	V_{OUT}		100, 250		mV _{RMS} , mV _{p-p}
Capacitive Load Start		2			Farad
Capacitive Load Switched	Recovers from a 68,000 μ F switched load in less than 75 ms.				
Efficiency at 50% load	η		94		%

Environmental, Compliance & Physical

Operating Ambient Temperature Range	-40°C to +75°C (Output derates at 2%/°C beginning at 55°C)
Cooling Method	Front to back airflow with onboard temperature controlled fans
Operating Relative Humidity	0 - 95% (non-condensing) for use in a controlled environment
Electromagnetic Compatibility	FCC Part 15, EN 55032 (CISPR32), EN 55024, Level A, GR-1089
Agency Certifications* planned	UL1950, EN62368, CSA*234/950, NEBS GR-1089, GR-63-CORE
Heat Release	205 Watts, or 700 BTU/hr at full load of 2080 Watts
Mean Time Between Failure (MTBF)	900k Hours @ 25°C per Telcordia SR-332, Method 1, Case 3
Height x Width x Depth, Weight, Packaged weight	1.63x5.23x13.85in (42x133x352mm), 5.05 lbs (2.2 kg), 5.95 lbs (2.7 kg)

Change History (excludes grammar & clarifications)

Revision	Date	Description of the change
1.1	07/16/2021	Initial Release
1.2	08/22/2023	Added ordering code under title
1.3	10/25/2023	Updated as per OmniOn template
1.4	01/04/2024	Updated to change FS to DS
